ABSTRACT

The purpose of this survey was to compile a list of districts and individual properties potentially eligible to the National Register of Historic Places within the city limits of Neenah, Wisconsin, as the first phase of the Neenah Historical and Architectural Survey and Nomination Project. Of the 1,087 properties surveyed, 172 were identified by the principal investigator as potentially eligible, 83% of which were within six districts. Two of these districts were commercial and the rest were residential. An additional 232 properties of unknown or future eligibility were also identified, 29% of which were within two residential districts. With the completion of the survey, it is recommended that the education and nomination phases of the project begin. In addition, it is recommended that a committee be appointed by the Mayor to formulate a landmarks commission ordinance in order to integrate historic preservation into public and private planning.

The purpose of the Intensive Survey was to compile a list of districts and individual properties potentially eligible to the National Register of Historic Places within the city limits of Neenah, Wisconsin. It was intended as the first phase of the Neenah Historical and Architectural Survey and Nomination Project. The project was begun to accomplish the following primary objectives:

- 1) To assist the City of Neenah to comply with the National Historic Preservation Act of 1966 in relation to the use of federal funds.
- 2) To nominate a downtown commercial district to the National Register to encourage private redevelopment.
- 3) To integrate historic preservation into public and private planning.

The scope of the survey was limited to the boundaries of the City of Neenah as shown on MAP I. Within those boundaries 1,087 properties were identified for study in order to meet the following secondary objectives:

- 1) To make the inventory usable for a minimum of ten years, considering buildings constructed through 1940.
- 2) To inventory properties throughout the City, providing the broadest distribution of community benefit.

Those agencies involved in the guidelines, funding, management, data gathering and completion of this project included the Historic Conservation and Recreation Service of the United States Department of the Interior, the Historic Preservation Division of the State Historical Society of Wisconsin, the Neenah Department of Community Development, the Neenah Downtown Business Association and the Neenah Historical Society.

Synopsis

Neenah began in 1835 as an industrial and agricultural mission for the Menominee Indians. Its early white settlement, attracted by the water power of the Fox River, started a few years later. This beginning was complicated by internal strife and the death of a major land owner. As a result, Neenah's growth lagged behind other villages in the area until after the Civil War. At that time clear titles, rail transportation and renewed economic vigor encouraged a boom in local industry. Neenah's role in Wisconsin's paper industry began during this period and resulted in the formation of the Kimberly-Clark Corporation in 1872.

The phenomenal success of this and other later paper companies in the area produced a dichotomous social structure dominated by some of the most influential families in the Fox River Valley and the state. This social structure and the industry that sustained it reached a plateau around the turn of the century, when labor activism and community consciousness began to emerge. After World War I industry turned from manufacturing commodities to products, creating more jobs and greater wealth. This continued industrial expansion provided Neenah with a stable economic environment throughout the Great Depression and created a strong professional middle class which ultimately has assumed community leadership.

(NOTE: Numerical footnotes cite sources listed at the end of this section; alphabetical footnotes cite districts and individual properties listed at the end of each theme.)

Early Settlement

In her book Millstone and Saw, Alice Smith gives this description of the headwaters of the Lower Fox River:

"As the Lower Fox River leaves Lake Winnebago it separates into two channels, which tumble over twin rapids before they reunite at Little Lake Butte des Morts a mile or so west. The crescent-shaped island formed by the division is a high-lying piece of land, once timbered to the water's edge with broad spreading oaks and elms."¹

Legend states that the Winnebago Indians tried to give this island to Governor James Doty as a token of their affection and esteem. Called Doty Island, it was at the center of an area first known as Winnebago Rapids. For centuries it was the home of the Winnebago and later the Menominee Indians.

The first white settlement began in 1835 as an industrial and agricultural mission to civilize the latter tribe. Part of the Stambaugh or Treaty of Washington, the mission consisted of a grist mill, saw mill, blacksmith shop, several block houses and numerous cabins all constructed along the south channel of the river. Under this same treaty, Doty Island and all lands north and east of the river were ceded to the federal government and offered for sale.² The mission, a dismal failure, closed in 1836 and the land was turned over to the government under the Treaty of Cedar Rapids (Kimberly). Not long afterwards, Governor Doty tried to offer the mission to Harrison Reed for \$600.³ Reed, one of Doty's political allies, ultimately had to buy the site from the government for \$4,760. The purchase price, however, was paid in 1846 by Harvey Jones in return for one half of the nearly 563 acres acquired by Reed.

Reed and Jones, along with Doty who had retired to the Island in 1845,^a became the principal developers of Winnebago Rapids. In 1847 Governor Doty, his son Charles, Harrison Reed,^b his brother Curtis and Harvey Jones chartered a company with the authority to construct and maintain a dam across each channel of the river for the production of water power. Disagreements were an immediate result. Charles Doty and Curtis Reed began the rival village of Menasha and their own dam on the north channel, and in 1849 induced the government to build

a lock and canal there. That same year Harrison Reed instituted legal proceedings against Jones for one fourth of the Winnebago Rapids site.⁴ Under these pressures, along with the strain of improving the water power on the south channel, Jones died leaving no will and three minor children.

The Village of Winnebago Rapids was incorporated the following year, but further land development was hopelessly mired in the courts. For some time the rival community of Menasha dominated the headwaters of the Lower Fox. Fortunately, Harvey Jones had sold important land and water power rights to several wealthy investors from New England.^c Through the infusion of their capital flour mills, foundries, saw mills, and other manufacturing and commercial enterprises flourished. These men and their families set the social and economic tempo of Winnebago Rapids and continued to do so long after the village was reincorporated as Neenah in 1856:

Industry and Commerce

Settlers were first attracted to Neenah by the presence of the Lower Fox River, a reliable source of transportation and power. The river was part of a long sought water route connecting the Great Lakes and the Mississippi, and a government project to improve this route had begun in 1849. At several locations locks and canals were necessary to circumnavigate falls and rapids, but these obstacles were also a source of considerable power. Dropping ten feet at Neenah, the river possessed a constant flow of clear water through arable land and nearby forests. Vital to the movement of goods as well as their manufacture, the river was the focus of industry and commerce.

When Neenah lost the government lock to the north channel, it was feared that Menasha would have a monopoly on transportation and commerce. To prevent this from happening a second lock and canal was constructed in Neenah. Along the southern shore of the Neenah Canal grew the commercial district and on the northern shore grew the milling district. Other industries, like the Neenah Stove Works,^a were similarly situated on the water's edge to receive raw materials and ship finished goods. Only with the arrival of the railroad in 1861 was the significance of river transportation diminished.

The significance of the water power was more constant. Between 1850 and 1860 the number of mills in Neenah increased from four to ten. Six of these were flour mills producing nearly \$250,000 worth of flour a year.⁵ Spurred on by the railroad and Civil War demand in the next decade Neenah had eleven flour mills -- half of all the flour mills in the county -- producing more than \$800,000 worth of flour annually.⁶ The largest was the Reliance Mill,^b one of the last constructed and one which helped rank Neenah second behind Milwaukee in terms of state production.⁷ By 1880 the number of mills had decreased to seven, but production had more than doubled due to the local perfection of the steel roller milling process. However, by 1890 flour milling in Neenah was essentially at an end due to the westward movement of wheat farming and the success of paper manufacturing.

The paper industry started in Neenah during the greatest expansion of flour milling, beginning with the Neenah Paper Mill in 1865. It was at the time a minor industry. From 1850 to 1870 Neenah's secondary industry dependent upon water power was lumber. In 1870, one Neenah saw mill alone cut 2,500,000 feet of lumber while others were turning out woodwork and other finished goods.⁸ By 1880 the secondary industry became paper. In the next decade it became not only the primary industry of Neenah but the most important in northeastern Wisconsin. As a result, Neenah and Menasha became the nucleus of a prosperous industrial district that comprised the entire Fox River Valley.⁹

The success of the paper industry was due to three factors. First, the manufacture of paper depended on great quantities of clear water, of which Neenah and Menasha had some of the best at the headwaters of the Lower Fox. Secondly, the wholesaling center of Chicago was excessable via the railroad. Finally, there was little competition in the Midwest, the nearest other manufacturer being in Ohio.¹⁰ With the capital investments of the Kimberly-Clark Corporation, the paper industry grew at an astounding rate.

Formed in 1872 as Kimberly, Clark & Company, Kimberly-Clark had four founders^c who made an initial investment of \$30,000 to build the Globe Mill and manufacture paper out of rags. This investment was increased to \$400,000 in 1880 after expansion into Appleton and conversion to paper made of wood pulp.^d In 1888 came another increase bringing capitalization to \$1,500,000 in order to finance further Appleton mills, the creation of the company town of Kimberly and its mills, and yet another mill at DePere. Stimulated by the singular success of this one Neenah company, Fox River Valley mills were producing more paper by 1892 than the largest eastern center. In that year, Kimberly-Clark alone produced more than \$3,500,000 worth of paper, making Neenah the Midwestern center for paper manufacturing.¹¹

Two other paper companies formed in Neenah as part of this industrial development. In 1874 the Patten Paper Mill was constructed. Later operated as the Neenah Paper Company,^e it was purchased by the Kimberly family in 1893. The Winnebago Paper Company was also built in 1874 and at one time had operations in Eau Claire.^f In 1904 it changed hands and became the Bergstrom Paper Company.^g Similar operations were also established in Menasha including the Menasha Paper Company in 1876, the George Whiting Paper Company in 1882, the Gilbert Paper Company in 1887 and the John Strange Paper Company in 1888.

The depression of the 1890's slowed the paper industry's headlong expansion, but not its impact on Neenah. The development of the paper industry

brought with it greater urbanization. Paper, unlike flour, was labor intensive and could be manufactured all year long. More jobs meant more people, and more people meant a change in local commerce, including the development of a neighborhood commercial district on Doty Island.^h Since the paper industry was also capital intensive, stores once operated by mill owners were sold to an emerging merchant class. Many of these businessmen built elaborate storefronts, reflecting the general prosperity of the times. Many of them also lived over their stores or rented the second floor as offices or club rooms, making the downtown a lively community center.ⁱ

After the turn of the century the paper industry began a second period of expansion emphasizing diversification. As early as 1907 paper, pulp and wood pulp were placed on the "free list" in trade agreements with Canada, where natural resources were more plentiful. This forced the paper industry in the valley to make the transition from generalized paper commodities towards specialized consumer products.^j As a result, chemists and engineers were brought to the area and corporate laboratories established. New products such as tissue, waxed paper and cellucotton^k were developed in response to the changing market pressures.

Diversification and the production of consumer products stimulated continued industrialization in the Fox River Valley, producing more jobs and greater wealth for the paper families in Neenah.^l This growth kept mills open and unemployment at a minimum throughout the Great Depression, while creating a professional middle class of industrial managers.^m

Transportation

The improvement of the Fox-Wisconsin waterway was one of the major undertakings of the fledgling State of Wisconsin. As early as 1829, land developers saw the improvement of these two rivers as a water route of significance beyond that of the Erie Canal. Begun in 1849 and completed in 1856, the system and its maintenance were a never ending source of trouble. In addition, it was never adequately supplied with a dependable shipping line. Five plank toll roads and several steamboats on Lake Winnebago were necessary to meet the deficiencies in the system. Nevertheless, this improvement and its national visibility brought farmers, businessmen and laborers to Neenah in hopes of benefiting from its development.¹²

Within a few years of its completion, the Fox-Wisconsin waterway was all but obsolete. In 1861 the Chicago & Northwestern Railroad reached Neenah, providing the community with fast, direct connections north to Green Bay and south to Chicago.^a By 1872 the Wisconsin Central Railroad reached communities in the central and northern part of the state from Menasha.^b The Milwaukee & Northern Railroad later made direct connections from Neenah to the City of Milwaukee.^c

The latter connection with Milwaukee ultimately caused the decline of the

flour industry and the rise of the paper industry. Milwaukee railroad investors bypassed the Fox River Valley in order to reach the undeveloped water power in Minneapolis and St. Paul. In doing so the flour mills of Neenah were cut off from Wisconsin's major port city and flour center.¹³ Connections with Chicago, however, enabled Neenah to become a major supplier of paper to the manufacturing and distributing center of the Midwest. Rail connections north to Green Bay also facilitated the expansion of Kimberly-Clark's manufacturing interests along the Lower Fox, while the Wisconsin Central expanded sources of wood pulp and gave access to other potential milling sites.

The growth of the paper industry along the river in turn gave rise to the development of a broad urban complex and the need for yet another mode of transportation. The "Interurban" or streetcar system began in Appleton in 1886 and spread quickly throughout the Valley. The Neenah & Menasha Electric Railway began operation in 1892 and was ultimately a part of a loosely integrated system that ran from Green Bay to Fond du Lac. Although initially opposed by the city council for fear of its adverse effect on local business, the integration of this system filled a demand for greater personal transportation ultimately met by the automobile.¹⁴

Labor Movement

Neenah experienced none of the great labor-capital conflicts that took place in many nineteenth century industrial centers, but as the accumulation of wealth broadened the gap between mill owner and mill worker, so grew labor

unrest. Beginning with a strike at Kimberly-Clark in 1872, Neenah workers sought shorter hours, more pay and safer working conditions. Unionism, however, was not generally supported even amongst the workers themselves. A few employees at Bergstrom Brothers' Foundry (Neenah Stove Works) formed a short-lived union in 1882, and in 1885 there was another unsuccessful attempt at unionism by Knights of Labor organizer Robert Schilling.¹⁵

The fear of unionism in industrial circles was heightened by the Depression of the 1890's, for despite the return of prosperity by mid-decade, rising costs in the paper industry threatened future economic uncertainty. Increasing local concern were the numerous strikes at the Neenah Boot & Shoe Company, the Menasha Wooden Ware Company and at the Paine Lumber Company in Oshkosh. Between 1901 and 1904 the International Brotherhood of Papermakers attempted to organize a valley union which resulted in several violent strikes.¹⁶

Kimberly-Clark, the primary target of the Brotherhood, set the pattern in local union relations by making small concessions and quietly undermining union leadership by refusing to recognize their authority. The failure of the Brotherhood to accomplish their goals put an end to significant unionism in the Valley for the next thirty years and promoted the formation of a stronger manufacturers' associations.¹⁷ Yet labor unrest within the paper industry also established greater plant safety, shorter and more efficient work shifts and general labor prosperity as the corporate and private goals of a second, younger generation of industrialists.^{a/18}

Government and Politics

Neenah was first incorporated as the Village of Winnebago Rapids in 1850

and reincorporated as the Village of Neenah in 1856. With the exception of one itinerent Indian trader, the presidents of the village boards were shopkeepers, as were most of the trustees.¹⁹ When Neenah incorporated as a city in 1873, this representation changed. The first mayors of Neenah were largely flour mill owners during the 1870's,^a followed by paper manufacturers in the 1880's.^b By the turn of the century, city government once again became dominated by local merchants.^{c/20}

The activities of the early village boards were mainly the establishment of ordinances and their enforcement, along with some road and sidewalk improvements. The final and perhaps most significant board action was the purchase of Riverside Park in 1872. City government was more active in improvements, including the installation of sewers beginning in 1881, the construction of City Hall^d in 1888, the digging of public wells in 1893 and the maintenance of ward houses.^e The fire department was voluntary until well into the 20th century, after which police and fire commissions were formed in compliance with state law.²¹ An integrated public sewer system was not established until 1935, followed by a water treatment plant in 1936.^f

Neenah's representation in state and national politics has been a small but continuous part of its history. During the 1870's, numerous elected officials in the state legislature were Neenah flour millers. During the 1880's, the paper manufacturers also began to take a role in state government and two went on to serve in Congress.^g

Education

The community's first public schoolhouse was established in 1847 in one of the mission cabins near the village green (Green Park).²² A formal school system, however, was not established until 1875, and then by a special act of the state legislature. At that time the first priority of the local board of education was to modernize seven school buildings, and to create an integrated ward system with a free high school. This goal was formally accomplished by 1906 with the completion of a separate high school building.^a

Neenah's approach to its public schools has been progressive. In 1896 Neenah was the first community in Wisconsin to have home economics taught in public schools, the second in the United States.²³ Two years later the school system also added a kindergarten to its program.²⁴ After World War I a renewed effort to modernize the system brought the replacement of each ward school^b and the high school^c itself. New schools were also added on the basis of population distribution rather than political boundaries.^d

Throughout the nineteenth century Neenah had only one parochial school. In the 1870's, Trinity Lutheran Church established its own school where children of the congregation could get a Christian education taught in German. All other parochial schools antedate World War II. A private school begun in 1910 was the Theda Clark School of Nursing.²⁵

- d. Wilson Elementary School, 1948; (900) Higgins Street, (53-34A).

Religion

The first formal services were performed in 1847, when home missionaries came to the area to help establish churches. The first of these were Congregationalist, Presbyterian and Methodist. A small Welsh Calvinistic church was also established at this time. By 1850 about one half of the adult population belonged to one congregation or another, with all services held in English except at the Welsh church.²⁶

The number of churches increased to five by 1860, eleven by 1870 and sixteen by 1880, after which there was a marked decline in church growth.²⁷ Of the sixteen churches established by 1880, eleven had services in a language other than English.^a Congregations ranged in size from 14 to 298, the largest being Presbyterian, Danish Evangelical Lutheran^b and German Evangelical Lutheran.²⁸ The first English Lutheran services were performed in 1912.^c Of the nineteen churches established before World War I, the First Presbyterian Church remained the largest and most influential.^d

While the population of Neenah was not exclusively Protestant, all Catholic services were held in Menasha until the construction of St. Margaret-Mary Church in 1933.^e

Ethnic Associations

Neenah's population growth during the nineteenth century was similar to numerous Wisconsin communities, reaching its peak growth during the 1870's. Throughout the 19th century approximately 30% of the total population was foreign born, ranging between 42% to 51% of the adult population.²⁹ These percentages were similar to those for other communities in the Fox River Valley and the state as a whole. As elsewhere, the foreign born population in Neenah declined rapidly after the turn of the century.

The composition of Neenah's ethnic community was Irish and Welsh at first, due to the labor force attracted by the construction of locks and canals. By 1860 Germans and Scandinavians (Norwegians and Danes) were in greater number, each about 34% of all foreign born residents.³⁰ While the Irish and Scandinavians were largely unskilled laborers, the Germans were shopkeepers and artisans, many of whom brought with them investment capital.³¹

Whatever the nationality, Neenah's foreign born resident retained little of his or her ethnic heritage. Foreign language churches,^a libraries, newspapers and clubs were prevalent, but ghettos were non-existent and assimilation was immediate. During the nineteenth and early twentieth century, ethnic bigotry was almost unknown and several members of Neenah's ethnic community were able to move into the highest ranks of the local industrial and social structure.^b

F.J. Sensenbrenner House, 1901; 402 East Wisconsin Avenue, (1-29).

Social and Fraternal Organizations

Much of Neenah's social life revolved around its churches, but very early secret societies and clubs of various types made their appearance. Oddfellows and Masons were amongst the first of these organizations. Another early organization was the Neenah Yacht Club, formed in 1855. The first service organization was the volunteer fire company formed in 1866, and the first benevolent society was the Schuetzen Bund formed in 1870. The latter was also one of several ethnic societies which included the United Danish Society and the Danish Brotherhood. During the 1880's and 1890's, numerous temperance and lecture societies were also organized.

With the exception of the Schuetzen Bund and the Danish Brotherhood, all organizations met in the homes of members or in halls that existed over downtown shops. Many of those organizations formed or continuing after the turn of the century, eventually acquired permanent meeting places or headquarters, including the Masons,^a the Equitable Reserve Association,^b the Boys' Brigade, the Neenah Club^c and the YWCA. Those organizations formed after World War I have been mostly nationally chartered service organizations.

- b. Equitable Fraternal Union Building, 1909; 116 South Commercial Street, (5-4).
- c. Neenah Opera House, 1902; 116 East Wisconsin Avenue, (4-3); altered.

Cultural and Art Institutions

Despite its early wealth, Neenah acquired its cultural and art institutions after the turn of the century. As with the social and fraternal organizations, the cost of permanent headquarters was prohibitive and not generally supported. With one notable exception, much of Neenah's cultural activities were conducted in churches, private residences or in halls over the stores downtown. As a part of its purpose, the Schuetzen Bund owned its own hall in order to provide its members and the community with a place for plays, musicals and gatherings of all kinds. Constructed in 1875, it burned in 1892.³²

At the opening of the twentieth century, three cultural institutions opened their doors through the generosity of Neenah's industrial families. The first was the Opera House in 1902,^a followed by the Public Library in 1904 and the S.A. Cook Armory in 1906.^b The latter, with its expansive drill hall, also served as a lecture center and a place for public dances. Neenah's only art institution was established by John and Evangeline Bergstrom in 1958 through the bequest of their home, an endowment, and Mrs. Bergstrom's collection of glass paperweights.^c

Parks

By the turn of the century Neenah had three public parks, the first two

being lands set aside by early real estate speculators. In 1846 Harvey Jones reserved an acre of land in his plat of the Village of Winnebago Rapids as a village green (Green Park), and in 1856 four acres of Bigelow's Addition (Lauden Field) similarly became public property.³³ The only land ever purchased specifically for park purposes was Riverside Park. Sold to the village in 1872, the nearly twenty acres cost \$4,400 and was subject to much controversy. Later it became a mecca for steamboat excursions from Appleton and Oshkosh. At that time, Neenah also had one private park on Lake Winnebago. Operated by the Schuetzen Bund, it was used by that organization for dances, picnics and contests in marksmanship.

After the turn of the century five more parks were acquired by the city, all gifts of wealthy residents. Shattuck Park was given in 1915,^a Doty Island Park in 1922,^b Kimberly Point Park in 1929,^c Washington Park in 1931, and the Neenah Pool and Recreation Building and land in 1940.^d Several of these tracts of land were improved and landscaped under the direction of their respective donors. All were subject to some modification by landscape architect Phelps Wyman of Milwaukee.³⁴

- c. J.C. Kimberly Lighthouse, 1944; Kimberly Point Park, (1-7).
- d. Recreation Building and Pool, 1940; (600) South Park Avenue, (43-13).

Medical History

During the nineteenth century Neenah had its share of dentists, doctors and surgeons, but during the early twentieth century it developed as a regional medical center. In 1909 Theda Clark Hospital was built by means of a single donation of \$96,000.³⁵ Enlarged at various points in its history, the hospital

had at one time its own school of nursing and today is complimented by a growing number of extensive clinics.^a

a. Donovan-Smith Medical Offices, 1926; 211 East Wisconsin Avenue, (3-36).

Neighborhoods

A Neenah editor, commenting on the water power and its potential, wrote the following in 1878:

"The writer predicts that another twenty years will find our city noted for its great wealth, its beautiful location, and its aristocratic social standing, rather than for its increased growth or added industry."³⁶

By the turn of the century this prediction had come true. Population had remained about the same, local industry had expanded into other communities and some of the wealthiest people in the Fox River Valley were living in Neenah. Local industrialization had produced a sharply drawn dichotomous social structure. As the only strong minority, the affluent of Neenah produced not one, but three distinct neighborhoods.

The first of these began with the formation of the village and was roughly defined by West Doty, Church, Caroline, and Commercial Streets. Established within walking distance of the commercial and milling districts, this neighborhood was home of many early industrialists and businessmen.^a Greek Revival and Italianate homes were built here during the height of the flour industry and were looked upon as symbols of Neenah's ascendancy to greatness.

The second prestigious neighborhood surrounded Riverside Park. Originally called Park Place or Park Row, the homes built in this more rural neighborhood were those belonging to the paper manufacturers.^b Their brick and shingle Queen

Anne mansions, set back on spacious lawns, represented far greater wealth and power than those of the flour millers. Physically removed from town on a rise of land nearly surrounded by water, the area was a source of pride for some as well as an object of derision for others. Commonly called "Piety Hill," this neighborhood was the home of the founders of Kimberly-Clark and was an inspiration for Edna Ferber's book Come and Get It.³⁷

A third neighborhood was even more removed. Located near the junction of East Forest Avenue and Ninth Street, this neighborhood was the home of Menasha's paper and woodenware manufacturers.^c Isolated on the south side of Doty Island, they built mansions amidst woodlots and pasturelands, some even larger and more grandiose than those in Park Place. These industrialists hoped to have the best of both worlds: proximity to their manufacturing interests in Menasha, as well as the paper magnates and social milieu of Neenah. Through the development of this neighborhood, Neenah became known as a city of mill owners.

Other nineteenth century neighborhoods were more heterogeneous and less distinct, with one notable exception. On the west end of Doty Island was a "city" within a city, in an area roughly defined by the Chicago & Northwestern Railroad and the river.^d Populated by New England Yankees, Germans and Scandinavians, this neighborhood had foreign and English speaking churches, its own stores and businesses^e and its own independent social structure. Other neighborhoods formed during the early twentieth century were primarily the result of expanded management and engineering departments of the paper industry.^f

Architecture

The first buildings in Neenah were PRIMITIVE.^a Beginning with the cabins and block houses constructed for the Winnebago Rapids Mission, logs were the primary building material, either in their natural round state or sawed into full-length "blocks." The first settlers also used logs in construction until the mission saw mill was adapted to produce finished lumber. The buildings constructed during this period were utilitarian and unembellished.

A second saw mill and a lath factory along with a brickyard and shingle factory supplied the materials for the first frame and brick buildings, which included the Winnebago House Hotel and the Kimberly Double House.³⁸ These were built in the GREEK REVIVAL^b style. Favored by the wealthy Eastern developers, this style of architecture adapted the facade of classic Greek temples to less pretentious buildings. In Neenah however, Greek Revival buildings seldom approached the grandeur of their counterparts in the east. Locally the temple facade was only suggested by pilasters, a broad entablature and a pedimented roofline. This simpler version was repeated in residential, commercial, industrial and church design from 1850 to 1860.

GOTHIC REVIVAL was less favored, as was the experimental OCTAGON^c design. By far the most fashionable architecture after Greek Revival was ITALIANATE.^d Cubic and symetrically balanced like Greek Revival, the Italianate house had a low-pitched roof, cupola and brackets under the eaves. Preferred in Neenah for residences from 1860 to 1870, its origin was the asymetrical ITALIAN VILLA.^e

With the rapid expansion of the paper industry more elaborate architecture was affordable. Between 1870 and 1890 builders became less conservative. Italianate and Gothic Revival continued in some favor, but with modifications. Incised floral designs, ornate brackets and other decorative features distinguished LATE GOTHIC REVIVAL,^f ITALIANATE-VICTORIAN,^g HIGH VICTORIAN GOTHIC^h and

LATE ITALIANATEⁱ from their antecedents. The French-inspired SECOND EMPIRE style of architecture was also part of this more expressive period, but in Neenah it was usually incorporated into ECLECTIC^j designs along with numerous other styles.

While some industrialists preferred the freedom of Eclectic architecture for their residences, others preferred the order of several "reform" movements. The first of these was QUEEN ANNE,^k identified by its round tower, asymmetrical composition and varied building materials. In Neenah this style was often combined with other reform movements as QUEEN ANNE-STICK STYLE^l and QUEEN ANNE--SHINGLE STYLE,^m respectively identified by "stick-work" and shingle siding. At the end of its popularity, LATE QUEEN ANNEⁿ houses and stores featured a round tower recessed into the main mass of the building.

Other reform directions, inspired by the Beaux Arts movement in Europe, experienced some favor in Neenah from 1890 to 1930. CHATEAUESQUE,^o COLONIAL REVIVAL,^p VICTORIAN ROMANESQUE,^q RICHARDSONIAN ROMANESQUE,^r NEO-CLASSIC^s and NEO-GEORGIAN^t architecture were commissioned by industrialists and prominent businessmen who were anxious to have their homes, stores and offices compare favorably with those in other major industrial centers. This trend in architecture, while diverse in its appearance, used historical precedent as a model and was generally identified by stone construction and classic ornamentation.

SULLIVANESQUE,^u PRAIRIE SCHOOL,^v ARTS & CRAFTS,^w BUNGALOW^x and COLONIAL REVIVAL BUNGALOW^y architecture were a part of an indiginous American movement. Popular in Neenah from 1900 to 1930, buildings of this type were of brick, stucco or clapboard construction with applied Art Nouveau ornamentation or exposed structural elements. The Bungalow was the first distinct style of architecture identified with Neenah labor.³⁹

Concurrently, PERIOD^z architecture was in vogue from 1920 to 1940. Rooted in the Beaux Art movement and favored by industrialists and middle management,

the Period style used historical precedent as an inspiration but not as a model. Tudor, Colonial, and Mission type homes utilized traditional features in combination with unconventional elements, creating a new architectural statement.

Futuristic architecture received a minor expression in Neenah after the 1930's and included ART DECO,^A INTERNATIONAL SCHOOL,^B WRIGHTIAN,^C MINIMALIST^D and NEW FORMALISM.^E Buildings reflecting this movement in architecture are identified by the predominance of steel and glass in construction, flat roofs, multi-planer geometric plans and the absence of ornamentation.

Architects

HENRY AULER^a (1884-1951) was an Oshkosh architect, first associated with William Waters and then with James P. Jensen and WALLACE BROWN.^b The firm of Auler, Jensen and Brown designed numerous noteworthy buildings in Oshkosh, including the Masonic Temple, the Paine Thrift Bank and the Wisconsin National Life Insurance Building.

The Chicago firm of FRANK A. CHILDS and WILLIAM J. SMITH^c (1895-1958) was prominent throughout the Midwest. Lawrence Memorial Chapel and Russell Sage Dormitory in Appleton, the First National Bank in Menasha and the Church of St. Stephen in Stevens Point were a few of their Wisconsin projects. The firm also did work for Northwestern University and designed buildings for several banks, insurance companies and schools in the Chicago area.⁴⁰

ALEXANDER C. ESCHWEILER^d (1865-1940) of Milwaukee was one of the most versatile and popular architects in Wisconsin. Many of the homes in North Point South Historic District in Milwaukee were designed by Eschweiler, as were several buildings on the Milwaukee-Downer College campus. He also designed the oriental gas station Wadhams Oil Company built during the 1920's.⁴¹ His residences are found throughout the state.

The Milwaukee firm of GEORGE B. FERRY (1851-1918) and ALFRED C. CLAS^e (1859-1942) was responsible for some of the state's most important buildings. Among their credits are the Frederick Pabst Mansion, the Public Library and Museum, and the Northwestern National Insurance Building in Milwaukee, and the State Historical Society Library in Madison.

The Green Bay firm of FOELLER, SCHOBBER and BOERNER^f were responsible for numerous buildings in Wisconsin, including hospitals, churches, prisons, schools and residences. The Waupun Public Library, St. Peter's Church in Oconto and the Kellogg Public Library in Green Bay are attributed to the senior partner Henry A. Foeller. Foeller was also instrumental in establishing Green Bay's parks, serving as park board president for many years.

CHARLES SUMNER FROST^g (1856-1931) of Chicago was a nationally known Midwestern architect responsible for many large buildings and fine residences. In Wisconsin he was particularly known for his railroad depots, which can be found in Milwaukee, Lake Geneva, Ashland, Watertown, Oconomowoc, Racine and Beaver Dam.

GEORGE FREDRICK KECK^h (1895-1980) was a Chicago architect who received national acclaim for his experimentation with solar architecture. He was best known for the House of Tomorrow and Crystal House in the 1933 Century of Progress Exposition.

SIDNEY LOVELLⁱ (1864-1938) was a Chicago architect born in Racine who began his career as an apprentice to a theater architect. He later specialized in mausoleums and designed several in various parts of the country. He also designed residences and apartment buildings.⁴²

ROBERT A MESSMER^j (1870-1943) was a Milwaukee architect who designed hospitals, schools and dormitories in all parts of Wisconsin. He also designed the Milwaukee Elks Club and the Wisconsin Building at the 1915 Panamanian Exhibition in San Francisco.⁴³

SKIDMORE, OWNING and MERRILL^k is one of the most famous architectural firms in America today. Their designs can be found in almost every major city and are considered models of contemporary architecture. The Hancock Building in Chicago is one of their most well known buildings.

THOMAS E. TALLMADGE^l (1876-1940) was a Chicago architect better known as an

author and architectural historian. A close friend of Louis Sullivan, Frank Lloyd Wright and others, Tallmadge coined the term "Chicago School" in reference to the architects and designs produced by that city.⁴⁴

WILLIAM WATERS^m (1843-1917) of Oshkosh was the best known and most prolific architect in the Fox River Valley. Numerous schools, churches, residences and public buildings in Oshkosh were designed by him, as were similar buildings in Neenah, Menasha, Appleton, Kimberly, Green Bay and other cities in Wisconsin. Among his better known works are the Grand Opera House in Oshkosh, the H.J. Rogers House in Appleton, and the Danes Home in Waupaca. Waters was also the architect for the Wisconsin Building at the 1893 Columbian Exhibition.

Other architects commissioned to design buildings in Neenah were FRAZIER AND RAFFERYⁿ (Chicago), HUGO C. HAEUSER^o (Milwaukee), CLARE HOSMER^p (Milwaukee), RICHARD KELLY^q (Neenah), PEACOCK and FRANK^r (Chicago), TUSLER and SETTER^s (Minneapolis), VAN ALYEA and SPINTI^t (Milwaukee) and WILLIAM WETMORE.^u

Notable Persons

EMIL ADERHOLD^a attended the first state dairy school in 1892 and pioneered Wisconsin's first skim milk evaporating plant in Neenah in 1894. Operating two cheese factories in New London, he later became state inspector and cheese grader, and was an instructor for the Wisconsin Dairy Association.⁴⁵

WILLIAM ARNEMANN^b was born in Germany and moved to Neenah in 1870 where he established the first soda water factory in this part of the state. In 1886, he began an active public life as alderman, three-term mayor and two-term state assemblyman.

The Babcock family came to Neenah in 1849. MARVIN BABCOCK was the contractor for the lock in Neenah, and his son HAVILAH BABCOCK,^c went into the dry goods business with J. Alfred Kimberly. Havilah Babcock later became a silent partner in Kimberly-Clark and the Bergstrom Brothers' Foundry. When Kimberly-Clark first incorporated Babcock was elected vice president. He married his partner's cousin Frances Kimberly, and their daughter HELEN BABCOCK was founder and patron of the Neenah YWCA (now Y-Community Center).

The Bergstrom family came to Menasha in 1852 from Norway. JOHN BERGSTROM first worked on the government lock in Menasha and later settled in Neenah as a blacksmith. In 1878 his sons DEIDRICK WALDEMAR^d and GEORGE O. BERGSTROM^e purchased the Neenah Stove Works which they operated until 1904. In that year, D.W. Bergstrom purchased the Winnebago Paper Mill and formed the Bergstrom Paper Company. George Bergstrom's son EDWIN BERGSTROM became an important architect in southern California and is credited with the design of the Pentagon.⁴⁶ D.W. Bergstrom's wife SARAH HOUGH BERGSTROM donated Washington Park to the city in 1931. His son JOHN NELSON BERGSTROM^f and his wife EVANGALINE HOYSTRADT BERGSTROM established the Bergstrom Art Center in 1958.

The Clark family came to Neenah in 1854. CHARLES BENJAMIN CLARK^g operated a hardware store after serving in the Civil War and then became a partner in Kimberly-Clark. While supervising the construction of mills throughout the Valley, he also served as an alderman, mayor, state assemblyman and U.S. Congressman. When Kimberly-Clark incorporated he was elected secretary and general manager. His daughter THEDA CLARK PETERS gave to many causes and left \$96,000 to the public in her will, used in 1909 for the construction of the hospital. Her brother C.B. CLARK, JR.^h was also a philanthropist, donating the land for Doty Island Park in 1922, building the school for nurses in 1928, assisting in the gift of the Park and Recreation Building in 1940, and being largely responsible for the rebuilding of the hospital in 1948. He was also mayor and a founder of the Neenah Club.

REV. O.P. CLINTON was a missionary for the Congregational Home Missionary Society. Through his connections Harrison Reed became acquainted with investor Harvey Jones. Clinton also performed the first formal Christian services in Neenah.

REV. J.E. CHAPIN was also a popular minister, serving the Presbyterian Church. A much respected religious leader in the community, he also formed the Boys' Brigade in 1900.

SAMUEL A. COOKⁱ was a Canadian immigrant who first became involved in railroad construction and lumbering in northern Wisconsin before moving to Neenah. In 1887 he purchased a part interest in the Neenah Paper Company and later expanded his milling interests into Menasha and Indiana. He served as mayor in 1888, was a state assemblyman in 1889 and served as a U.S. Congressman in 1894. In 1906, he built the S.A. Cook Armory for the local National Guard.

GEORGE DANIELSON^j came to Neenah in 1854 from Norway. He was a millwright and a contractor, building many of the paper mills along the Fox River and in other parts of the country. In Neenah he was the contractor for Kimberly-Clark's Globe Mill.⁴⁷ He also served one term as state assemblyman.

JOHN R. DAVIS, SR.^k came to Neenah in 1849 from Wales. At first a wagon maker, he later became interested in flour and saw milling. In 1874, he founded and served as president of the Winnebago Paper Company.

GOVERNOR JAMES D. DOTY^l came to Neenah in 1845 after retiring from public office. In 1848, however, he became a member of Congress and in 1860 was appointed by President Lincoln as Superintendent of Indian Affairs in the Utah territory. In 1863 he became territorial governor. Governor Doty is also credited with naming Neenah after the Menominee word for the Fox River.

ALBERT EISENACH^m came to Neenah from Prussia in 1854. In 1876 he established a brick yard, the product of which built many of Neenah's masonry buildings.⁴⁸

The Gilbert family came to Neenah in 1881 from Chicago, where they ran a wholesale paper distributing business for eastern concerns. With George Whiting they established one paper mill in Menasha in 1882, then formed a separate paper company there in 1887, headed by WILLIAM GILBERT, SR.ⁿ and his four sons.^o

WATKIN GITTENS^p came to this country from Wales in 1848 and settled in Neenah in 1874. As a carpenter and building contractor, he was responsible for many of the largest mansions in Neenah.

FRANK W. HAWKS^q moved to Neenah in 1899 after his marriage to Helen Howard. In Neenah Frank Hawks went into business with his father-in-law, Charles W. Howard, making investments in Menasha. His son, HOWARD HAWKS, later became a famous Hollywood film director and worked on the film version of Edna Ferber's book Come and Get It.⁴⁹

MYRON HAYNES^r came to Neenah in 1865 from Whitewater to work as a papermaker and superintendent of the Neenah Paper Mill.⁵⁰ A pioneer papermaker in Wisconsin, Haynes was responsible for interesting C.B. Clark, Sr. in the paper industry. He was later hired by Kimberly-Clark as the superintendent of the Globe Mill.

The Herziger family came to Neenah in 1881 from Germany. LOUIS HERZIGER, SR.^s was a butcher and LOUIS HERZIGER, JR.^t was a farmer and land developer. JOHN HERZIGER^u was instrumental in establishing motion pictures in Neenah and was responsible for the conversion of the Opera House to movies. All were instrumental in the development of Doty Island and two were active in local politics.

CHARLES W. HOWARD^v came to Neenah in 1862 and engaged in the harness business. In 1874 he joined A.W. Patten in the manufacture of paper, a business he continued off and on for several years.

GEORGE JAGERSON^w was a Neenah native in the fuel business. He was also an active political figure, serving as a national delegate to the Democratic

convention in 1929 and again in 1932. An intimate friend of Governor Schmedeman, he served as a colonel on the governor's staff.

The Jamison family came to Neenah in 1850. JOHN JAMISON^X was a millwright and one of the partners in the construction of the Neenah Paper Mill in 1865. He also ran a machine shop supplying the paper mills with rolls and doing repair work (J.W. Hewitt Machine Company). His daughter JENNIE JAMISON was the instructor of the second class in the United States which taught home economics.⁵¹

HARVEY JONES first came to Neenah in 1846 and soon afterwards bought a half interest in the settlement from Harrison Reed. He was instrumental in the water power development, building the dam, widening the canal and adding a raceway. His inability to work with other local investors and sudden death in 1849, hampered Neenah's growth.

REV. JENS N. JERSILD^Y was pastor for the Danish Lutheran Church after he came to this country from Denmark in 1884. In 1899 he began what is now called Jersild Knitting Company, at one time reputed to be the second largest knitting concern in the United States.⁵²

JUDGE JAMES C. KERWIN^Z was a native of Menasha who began law practice in Neenah in 1875. Married to the daughter of P.V. Lawson Sr., he was involved in the ownership of Menasha's water power rights until the turn of the century. In 1904 he was elected to the State Supreme Court.

The Kimberly family came to Neenah in 1849 and remained into the twentieth century the most influential family in the community. JOHN and HARVEY KIMBERLY^A brought with them \$15,000, or one fourth of all the capital wealth of the village.⁵² They built the first brick store, the second mill on the Neenah water power, and invested heavily in local real estate. Irrevocably split over the Civil War, the Harvey Kimberly line remained in flour until DANIEL LUCIUS KIMBERLY, JR.^B helped found Hardwood Products Corporation.⁵³ The John Kimberly

line continued in flour with the building of the Reliance Mill, but J. ALFRED KIMBERLY^C started the family in paper as a founder and first president of Kimberly-Clark. His wife HELEN CHENEY KIMBERLY was instrumental in starting the class in home economics, and his daughter HELEN KIMBERLY STUART^D was an alderman and donor of Kimberly Point Park. His son J.C. KIMBERLY^E was responsible for directing the company to diversify into paper products.

A.H.F. KRUEGER came to Neenah from Germany in 1868 and entered into the flour industry with Charles Stridde. Married to the daughter of Dr. N.S. Robinson, he was also alderman, mayor, state assemblyman and founder of the Schuetzen Bund.

EDMUND J. LACHMANN^F was a Neenah native who began his career in the A.H.F. Krueger's flour mill, becoming a partner in 1883. Married to Krueger's daughter, he later formed his own grain company and was founder and president of Lakeside Paper Company in 1910. One time mayor, E.J. Lachmann was also organizer of the Neenah State Bank.

ERNST MAHLER^G came to this country from Germany in 1914 to establish laboratories for Kimberly-Clark. His development of Cellucotton gave new direction to the paper industry and helped make Kimberly-Clark a multi-national corporation. Mahler was also founder of the Institute of Paper Chemistry in Appleton.

TRUMAN T. MOULTON^H came to Neenah in 1858. In 1860 he established a limeworks in Menasha, which he moved to Neenah in 1872. A highly respected man in the community, he was the first superintendent of schools and was the owner of the last lake steamer.⁵⁴

ASA W. PATTEN^I came to Neenah in the 1850's as a cabinet maker. Through shrewd real estate and flour mill investments, he was able to build the Patten Paper Mill (Neenah Paper Company Mills) in 1874. In 1883 he left Neenah to establish additional milling interests in the Appleton area.⁵⁵

SAMUEL N. PICKARD^J was brought to Neenah in 1932 by S.F. Shattuck to help the National Manufacturers' Bank through the Great Depression. Pickard was also instrumental in the establishment of a Neenah radio station, the building of a new hotel, and numerous other community projects.

JOHN PROCTOR came to Neenah in 1857 and went into partnership with Edward Smith in flour milling. At one time state assemblyman, John Proctor led the campaign for the purchase of Riverside Park in 1872.

HARRISON REED^K moved to Neenah in 1843. Founder of the Milwaukee Sentinel, he purchased the Winnebago Rapids Mission in 1846 with the financial assistance of Harvey Jones, then went on to serve as a delegate to the state Constitutional Convention in 1847. He was also a founder of the Republican Party. In 1862 he was appointed as a federal tax commissioner in Florida, where he was elected governor in 1868.⁵⁶

DR. NATHANIEL S. ROBINSON^L came to Neenah in 1858, a graduate of Harvard Medical School. In 1865 he was one of the founding owners of the Neenah Paper Mill. In 1867 Dr. Robinson returned to his medical practice and later was elected to the state assembly in 1875.

CHARLES SCHULTZ^M came to Neenah in 1885 and set up a cigar making business which became one of the best known in the state.⁵⁷ He became an alderman in 1898, and later became mayor and a state assemblyman.

F.J. SENSENBRENNER,^N a native of Menasha, rose through the ranks of Kimberly-Clark to become the company's second president. With extensive banking and insurance holdings, at his death he was considered one of the wealthiest and most powerful men in the state. He was also a major benefactor of Marquette University.

F.C. SHATTUCK^O settled in Neenah in 1874 after becoming a silent partner in Kimberly-Clark. When the company incorporated, he became treasurer. His son ARTHUR SHATTUCK was a world famous concert pianist and a friend of Edvard Grieg.

His other son S.F. SHATTUCK^P was also associated with Kimberly-Clark and spearheaded a program to increase plant safety. S.F. Shattuck also gave generously to the community, including the high school playing fields in 1931 and the Park and Recreation Building in 1940. Private colleges throughout Wisconsin were the recipient of his gifts. His mother CLARA MERRIMAN SHATTUCK^Q donated Shattuck Park in 1915.

The Sherry family came to Neenah in 1849. HUGH SHERRY^R built a flour mill in 1856 and his son HENRY SHERRY^S later had saw milling interests throughout the Midwest. He was one of Wisconsin's best known lumbermen and was responsible for much of Neenah's residential and commercial development. He was also founder of Park Falls, Wisconsin.⁵⁸

ROBERT SHIELLS^T came to Neenah in 1861 from Scotland and established the First National Bank of Neenah in 1865, later becoming its president. As president of the Library Association, he acquired a Carnegie grant for the construction of the public library in 1904.

CHARLES R. SMITH^U, a native of Menasha, was the son of Menasha Wooden Ware Company founder Elisha D. Smith. As president of the company, C.R. Smith was responsible for expanding its business throughout the United States. He was also the founder of the Wisconsin Northern Railroad and Ladysmith, Wisconsin.⁵⁹

EDWARD SMITH^V came to Neenah in 1850 and engaged in merchandizing. Later he became the partner in a flour mill with John Proctor, and in 1865 became one of the founders of the Neenah Paper Mill. In 1872 he helped organize the Wisconsin Central Railroad and the following year was elected Neenah's first mayor.⁶⁰ His brother HIRAM SMITH^W came to Neenah in 1854 and began a lifelong partnership with D.C. Van Ostrand which culminated in the formation of the Manufacturers' National Bank (Marine National Bank).

JOHN STEVENS came to Neenah in 1853 from Wales. Working his way up in the flour industry, he perfected the use of steel rollers in the milling of flour. After obtaining patents for their manufacture, he sold them and retired in 1881.⁶¹

JOHN STRANGE came to Menasha in the 1860's and through various business associations developed interests in the lumber and paper industry, founding the John Strange Paper Company in 1888. Strange purchased Governor Doty's log home on the Island and the adjacent residence, and in 1908 he was elected Lieutenant Governor.

ALEXANDER SYME^X came to Menasha in 1850's as a miller. By the 1870's he had expanded his interests to include two barrel factories in Appleton and into speculating in Milwaukee wheat.⁶² At the height of his success in the flour industry, he moved to Neenah.

DEWITT C. VAN OSTRAND^Y came to Neenah in 1850 and later entered into several partnerships with Hiram Smith, including the operation of the Neenah Paper Mill, the Neenah Stove Works, and the Manufacturers' National Bank. His first business venture in the area was shipping on the Fox-Wisconsin waterway.⁶³

ERNST F. WIECKERT^Z came to Neenah from Germany in 1868. In 1874 he bought a planing mill from Henry Sherry. Better known as the Neenah Planing Mill, the firm produced woodwork for many buildings in Neenah, including the City Hall, the Havilah Babcock House and the F.J. Sensenbrenner house, as well as many factories in the valley.⁶⁴

EDWIN WILLIAMS^{aa} moved to Neenah from Menasha in 1888 after teaching and being superintendent of its public schools. Pursuing the same occupation in Neenah, he became mayor in 1894 and state assemblyman in 1898. The year before, he was one of the founders of the Equitable Fraternal Union (Equitable Reserve Association) and was its president for many years.

GEORGE WHITING came to Neenah in 1864 and began his connection with the paper industry in 1874 at the Winnebago Paper Company. In 1882 he went into business with the Gilberts, but continued on his own in 1887. Whiting became mayor of Neenah, a member of the governor's staff in 1888 and was generous to local churches and universities.

Bibliography

The following sources were used in preparing the preceding themes on the history of Neenah. Shattuck's A History of Neenah was particularly helpful in that the second half of the book is arranged by theme (industry, labor, city government, etc.). The books by Glaab and Larsen, and by Alice Smith were essential to appreciating the major forces shaping the development of the community.

- Glaab, Charles N. and Larsen, Lawrence H.; Factories in the Valley; Madison, Wisconsin; State Historical Society of Wisconsin, 1969.
- Harney, Richard; History of Winnebago County; Oshkosh, Wisconsin; Allen & Hicks Book Printers, 1880.
- Lawson, P.V. Jr.; History of Winnebago County; Chicago, Illinois; C.F. Cooper & Co., 1908; two volumes.
- Shattuck, S.F. et.al.; A History of Neenah; Menasha, Wisconsin; George Banta Company, 1958.
- Smith, Alice; Millstone and Saw; Madison, Wisconsin; State Historical Society of Wisconsin, 1966.
- _____ ; The History of Wisconsin; Madison, Wisconsin; State Historical Society of Wisconsin, 1973.
- Titus, William A.; History of the Fox River Valley; Chicago, Illinois; S.J. Clarke Publishing Company, 1930; three volumes.

P.V. Lawson's history is of use if approached with caution. Much of his biographical material seems to have been written from his memory of personal acquaintances. Dates are often inaccurate.

Some sources were particularly useful for the development of a particular historical theme:

- Anonymous; A Century of Worship and Service; Neenah, Wisconsin; published privately, 1948.

A history of the First Presbyterian Church, this book provides an excellent background to the establishment of religious services in Neenah, including a map in the frontispiece locating where several early churches once stood.

Anonymous; Four Men and a Machine; Neenah, Wisconsin; published privately, 1947.

This history of the Kimberly-Clark Corporation provides the internal picture of the company's rapid growth and success. Read in conjunction with Glaab and Larson's chapters on the paper industry, one can easily see how this company shaped a major Wisconsin industry.

Cloak, Evelyn Campbell; Glass Paperweights of the Bergstrom Art Center; New York City, New York; Crown Publishers, 1969.

The history of the Art Center and some biographical information on the Bergstroms came from this source.

Cunningham, G.A.; History of Neenah; Neenah, Wisconsin; Gazette Printing Company, 1878.

This book depicted the early settlement of Neenah better than any other. Its only drawback is that it was written using as references natural and man-made landmarks that no longer exist.

McDonald, Forrest; Let There Be Light; Madison, Wisconsin; American History Research Center, 1957.

This book was used to clarify the history of the interurban electric street car system in the Fox River Valley. The primary focus of the text is the development of electricity in Wisconsin. Sources used to establish the role of the Park Place District in the writing of Come and Get It by Edna Ferber, and the making of the movie by Howard Hawks, include the following:

Ferber, Edna; Come and Get It; Garden City, New York; Doubleday, Doran and Company, 1936.
Gilbert, Julie Goldsmith; Ferber, A Biography; Garden City, New York; Doubleday and Company, 1978.
Marx, Arthur; Goldwyn: A Biography of the Man Behind the Myth; New York, New York; W.W. Norton and Company, 1976.
Sarris, Andrew; Interviews With Film Directors; Indianapolis, Indiana; Bobbs--Merril Inc., 1967.

All of these sources and others helped to build biographical sketches of Notable Persons. Titus' history had the most reliable and diverse biographies. Additional information came from obituaries found in local newspapers, including the Twin City News-Record, the Daily News-Times, the Neenah Daily Times, the Neenah Gazette, and the Daily News. A major source for data on architects was the Intensive Historic Survey for the City of Oshkosh, Wisconsin. This provided background information on Auler, Brown and Waters. Data on the firm of Childs & Smith came from the Burnham Library Index to Art Periodicals in Chicago, and the Historic Structures Survey conducted by the Illinois State Historic Preservation Officer, Illinois Department of Conservation, Springfield. These same sources provided information on Lovell along with the following:

Anonymous; "Sidney Lovell"; Monthly Bulletin of the Illinois Society of Architects; vol. 23, no. 8; Oct.-Nov., 1938.

The following sources provided information on Ferry & Clas, Messmer, Eschweiler, Keck and Tallmadge, respectively:

Adams, Peter J.; "Franklyn C. Shattuck House Nomination"; Neenah, Wisconsin; 1979.

Anonymous; "Robert A. Messmer"; Milwaukee Journal, January 18, 1943; State Historical Society of Wisconsin Necrology; vol. 48, p. 148.

Filipowicz, Diane H.; "Eschweiler Thematic Resources of Marathon County"; Madison, Wisconsin; State Historical Society of Wisconsin, 1979.

Johnson, Kevin; "The Natural Thing To Do"; Chicago Reader; vol. 11, no. 9; November 27, 1981; p. 8.

Peisch, Mark L.; Chicago School of Architecture; New York City, New York; Random House, 1964.

Additional information on architects came from the Historic Preservation Division's inventory of architects.

Sources used in the discussion of architecture in Neenah included the following:

Blumenson, John J.-G.; Identifying American Architecture; Nashville, Tennessee; American Association for State and Local History, 1977.

Whiffen, Marcus; American Architecture Since 1780; Cambridge, Massachusetts; M.I.T Press, 1969.

METHODOLOGY

EMPLOYEES OF THE BADGER-GLOBE MILL

Ca. 1880

Courtesy of the Neenah Public Library

In order to accomplish the primary and secondary goals established for this project (See INTRODUCTION), the survey work was divided into four phases. The first phase identified those properties to be examined and evaluated. The second phase examined each property for owners, age, use, architect and architectural style. The third phase evaluated districts and individual properties for potential eligibility to the National Register of Historic Places. Finally, the fourth phase compiled the results of the preceding phases for state and local use. The procedures for each of these phases followed those recommended by the Historic Preservation Division of the State Historical Society of Wisconsin.

Identification Phase

The Identification Phase began with a list of those properties on the Wisconsin Inventory of Historic Places (1977 "Windshield" Survey). Inventory cards from this project were copied and corrected. Those properties demolished since 1977 were stricken from the inventory and those extensively altered were scheduled to be re-photographed.

Additional properties were then listed on the inventory by means of a street-by-street reconnaissance using the following general criteria:

- 1) Architectural integrity
- 2) Use and style
- 3) Neighborhood continuity
- 4) Visual impact
- 5) Known historical significance

The condition of each property was noted, as were special features and alterations. Properties listed on the completed inventory were then mapped in order to identify potential historic districts. These districts were then

reviewed by Barbara Wyatt of the Historic Preservation Division.

In the Identification Phase, volunteers were assigned to photograph each new listing and find the name and address of the current owner in the City Assessor's records.

Examination Phase

The Examination Phase began with the preparation of an Intensive Survey Form for each property on the inventory. The current owner, condition, special features and alterations were entered to these forms. The City Assessor's records were then consulted for an estimated construction date for each property. These dates were then checked against city and county directories. The original owner and his or her occupation as listed in the directories were also noted on the forms. The Neenah Tax Records were then referred to in order to further verify the age and original owner. Those properties of undeterminable age and ownership were eliminated from further historical research.

A list of original owners was compiled next. Each name was entered onto a separate data sheet along with the address of the associated property and its construction date. Local cemetery records were consulted, death dates entered and local newspapers searched for obituaries. Data from these obituaries were noted on the data sheets, as was any information found in secondary resources (histories, newspaper articles, etc.). Each sheet was then attached to the corresponding Intensive Survey Form.

Current property owners were selectively contacted for information on the architect of their property. Particular emphasis was given to those properties within identified districts. In consultation with Diane Filipowicz of the Historic Preservation Division, each property on the Wisconsin Inventory of Historic Places was reviewed for its architectural style, integrity and possible

significance. On the basis of her comments, all remaining properties were reviewed by the Primary Investigator.

Volunteers also participated at various stages throughout this phase of the project, assisting in the gathering and control of data.

Evaluation Phase

The Evaluation Phase began by compiling statements of architectural and historical significance on the Intensive Survey Forms. Statements of architectural significance contained a description of key features, style and architectural integrity as appropriate. Statements of historical significance contained a biographical sketch of the original owner and the use of the property. The inventory was then sorted into district or individual property status.

Districts were re-evaluated at this point on the basis of the properties they contained. Within each district properties were identified as pivotal, contributing or non-contributing depending on the strength of their historical and architectural statements, and their relationship to other properties in the district. Those districts with a large proportion of correlating pivotal properties were then named and a statement of significance prepared for the district. Those districts with a small number of correlating pivotal properties were disregarded and the properties were returned to the individual property status. Each remaining district was then evaluated for its potential eligibility to the National Register and its national, state or local significance.

Individual properties were then considered on their separate merits. Those properties of strong historical and architectural significance were determined to be potentially eligible to the National Register. Those properties of strong architectural significance alone were considered potentially eligible if the style and integrity were outstanding or the best example in the city. Those

properties of strong historical significance alone were considered potentially eligible if the original owner or use associated with it were vital to the appreciation of local or regional history. All three types were evaluated for their national, state or local significance.

Those individual properties of strong historical significance but severely altered architecturally, were evaluated to be of unknown eligibility. Those districts and individual properties of strong historical and architectural significance but less than fifty years old were also evaluated to be of unknown eligibility.

Compilation Phase

The Compilation Phase began by preparing Inventory Cards, final Intensive Survey Forms and District Survey Forms for each property and district. Black and white photographs were attached to each Inventory Card and contact prints were attached to each Intensive Survey Form and District Survey Form. The Inventory Cards, Intensive Survey Forms and District Survey Forms were returned to the Historic Preservation Division for permanent record, and a xerox copy of each Intensive Survey Form and District Survey Form was put on file in the Neenah Department of Community Development office.

RESULTS

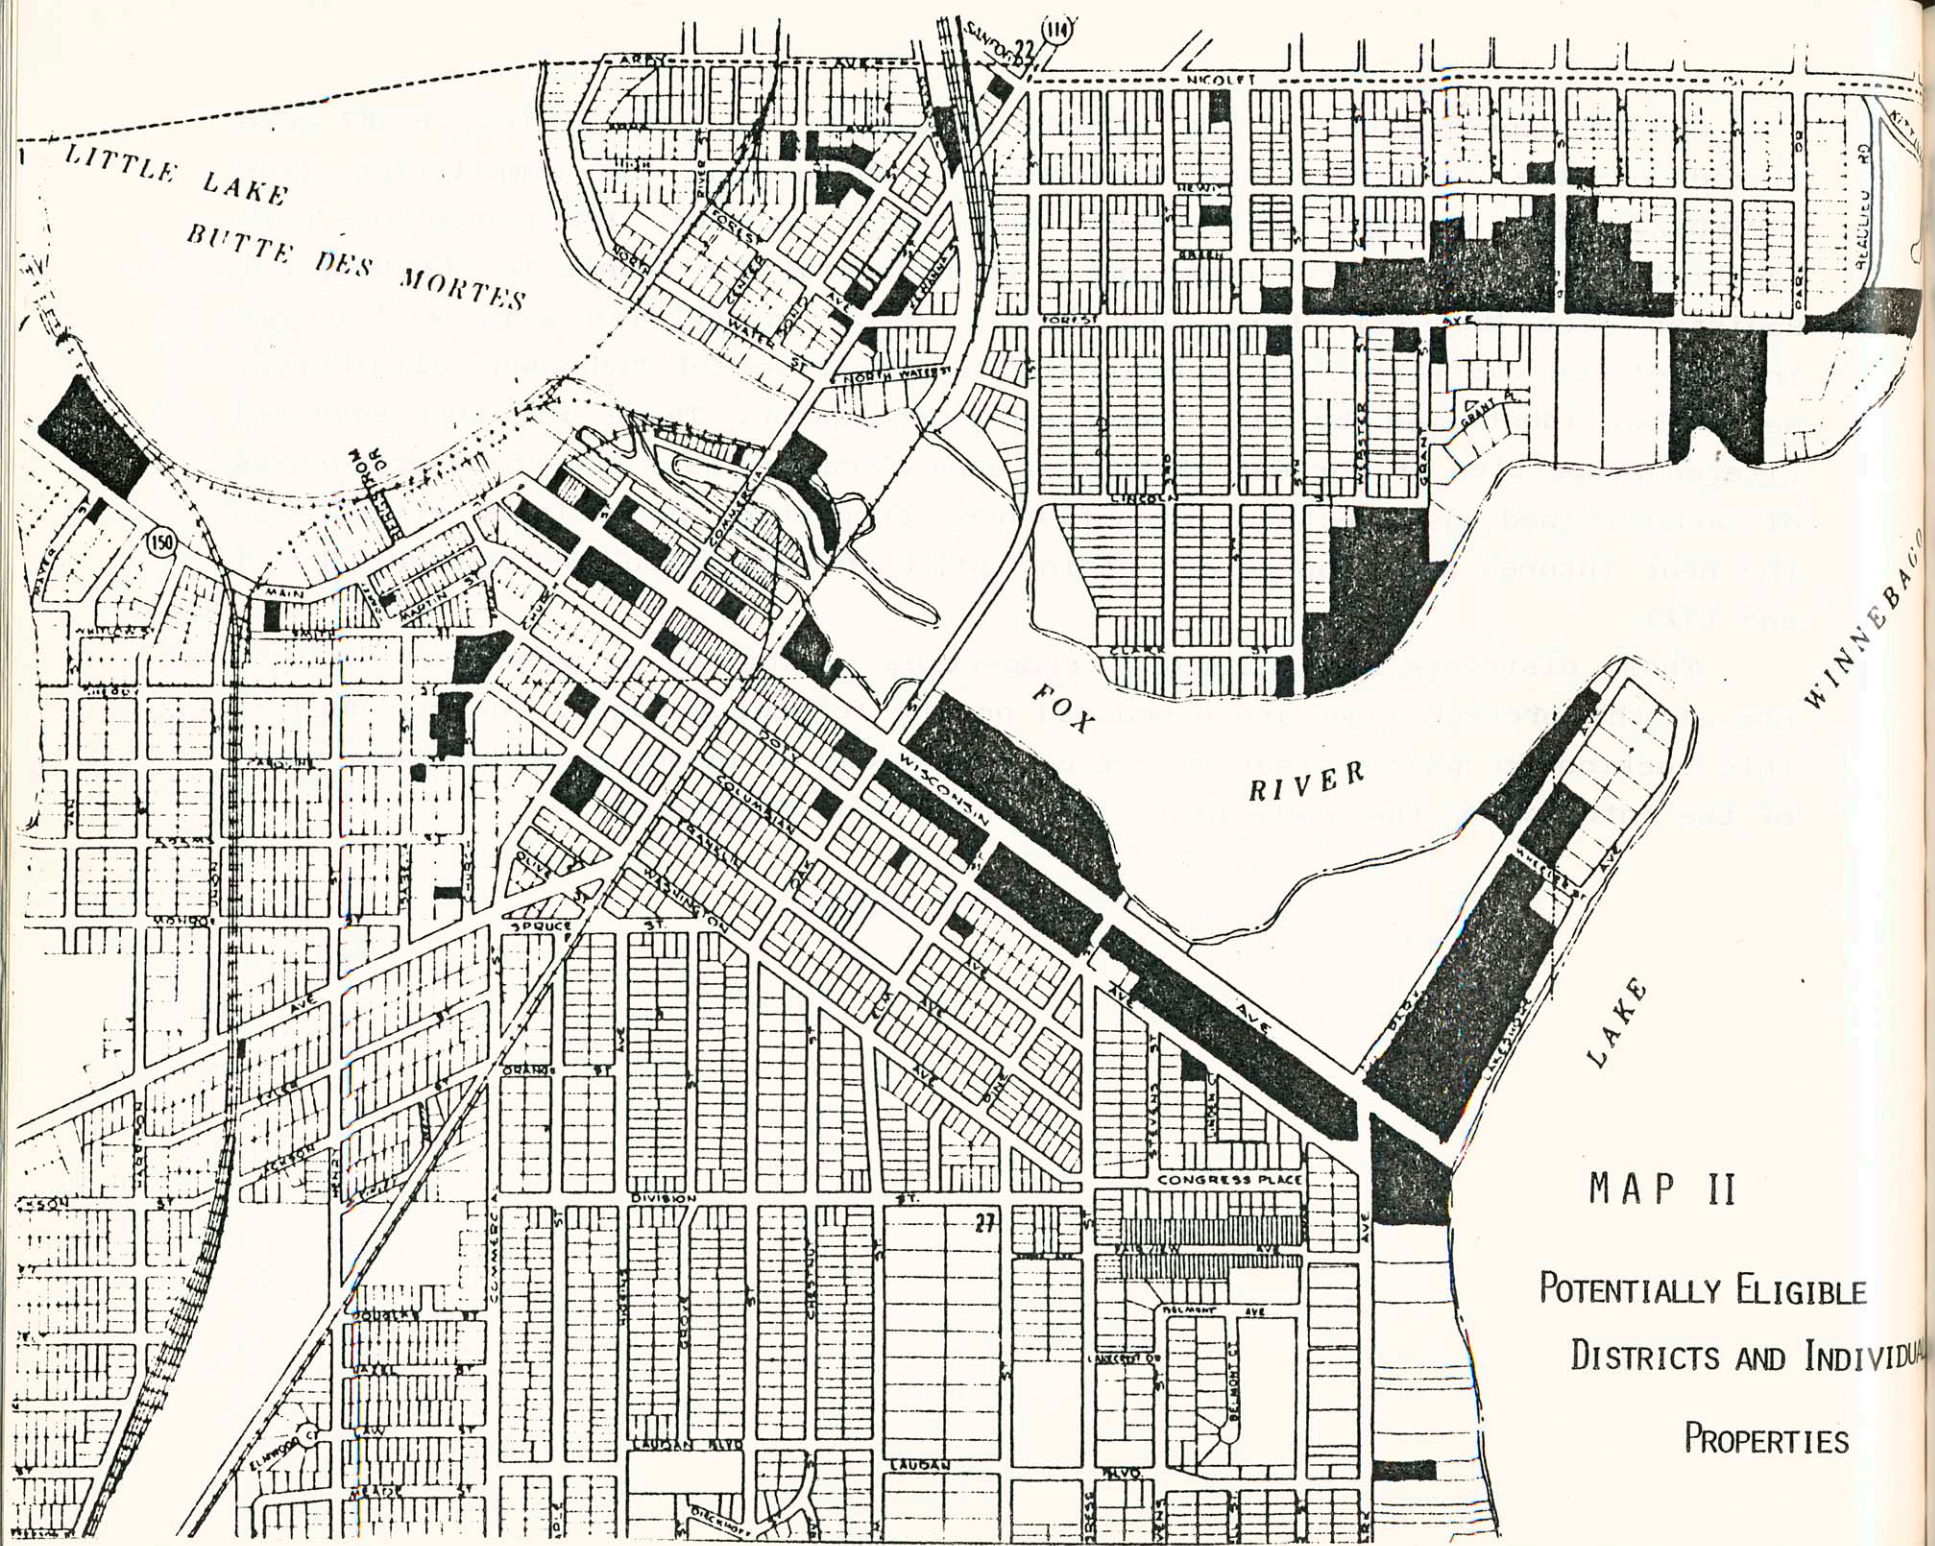

WEST WISCONSIN AVENUE LOOKING NORTH

Ca. 1890

Courtesy of George and Ila Arndt

Out of approximately 7,700 properties within the city limits, 1,087 were listed on the inventory for examination, evaluation and compilation (See APPENDIX I for a complete listing). From this inventory 172 properties were identified by the Primary Investigator as potentially eligible to the National Register (See MAP II). More than 83% of those properties were within six inter-related districts. An additional 232 properties of "unknown" eligibility were also identified by the Principal Investigator. These included severely altered properties of current historical significance, well-preserved properties of undetermined architectural significance, properties potentially eligible in the near future, and properties needing additional research (See APPENDICIES II and III).

Those districts and individual properties identified as potentially eligible at the present time are discussed on the following pages. The contents of this section do not necessarily reflect the views or opinions of the Department of the Interior or the State Historical Society of Wisconsin.

MAP II

POTENTIALLY ELIGIBLE
DISTRICTS AND INDIVIDUAL
PROPERTIES

Park Place District

The Park Place district is the largest and most significant. A total of 69 properties are within its boundaries, and it contains the city's greatest concentration of architecturally and historically significant properties. Developed in the vicinity of Riverside Park from which it derived its name, the area was a popular neighborhood for three generations of Neenah's leading industrialists and merchants. The homes in this district include those of the founders of the Kimberly-Clark Corporation, world-famous concert pianist Arthur Shattuck and Hollywood film director Howard Hawks. The Park Place District was also the setting of Edna Ferber's book Come and Get It, later a film directed by Hawks.

The Park Place district is of state significance. The residents of this district were the single most influential people in the growth and development of the Fox River Valley as a center for paper manufacturing. Their homes are also representative works of some of Wisconsin's most noted architects including William Waters, Ferry & Clas, A. C. Eschweiler, and Van Alyea & Spinti. As the setting of a novel and film, the Park Place District has the added distinction of playing a role in the history of American literature and cinema. Two properties within this district are already listed on the National Register. (See MAP III and TABLE I).

The particular feature of the Park Place District is the concentration of properties associated with the founders of the Kimberly-Clark Corporation and their families. The first of these is the Kimberly Double House at 404 E. Wisconsin Avenue. This is the oldest frame building in the city At 410 E. Wisconsin Avenue is the home of J.A. Kimberly, one of the company's four founders. His partners lived at 537 E. Wisconsin Avenue (Havilah Babcock House, NRHP 1974), 547 E. Wisconsin Avenue (Franklyn C. Shattuck House, NRHP 1978), and

583 E. Wisconsin Avenue (C.B. Clark House). This last house was moved to its present location from 561 E. Wisconsin Avenue and was extensively remodeled. The Caroline Hubbard Clark House at 561 E. Wisconsin Avenue was completed by the widow of C.B. Clark. The children of the founders lived at these addresses and at 617 E. Wisconsin Avenue (C.B. Clark Jr. House), 324 E. Wisconsin Avenue (Greenwood-Shattuck House), 220 N. Park Avenue (Edward Beals House) and 433 E. Wisconsin Avenue (Frank W. Hawks House).

Properties associated with Kimberly-Clark president F.J. Sensenbrenner and his family include 402 E. Wisconsin Avenue (F.J. Sensenbrenner House) 173 N. Park Avenue (George Gilbert House), 223 N. Park Avenue (James Bergstrom House) and 256 N. Park Avenue (Gaylord-Sensenbrenner House). The R.W. Lyons House at 447 E. Wisconsin Avenue and the J. Fredrick Hunt House at 603 E. Wisconsin Avenue were built by other executives in the company. Houses associated with other paper industry leaders include 143 N. Park Avenue (Gaylord-Wing House), 157 North Park Avenue (D.W. Bergstrom Jr.. House), 165 N. Park Avenue (John N. Bergstrom House), 409 E. Wisconsin Avenue (Charles W. Howard House), 415 E. Wisconsin Avenue (John R. Davis Sr. House) and 620 E. Wisconsin Avenue (Albert C. Gilbert House).

Menasha Colony District

The Menasha Colony District is the second largest district in terms of area covered. It contains 29 properties within its boundaries and is an important historical compliment to the Park Place District. The Menasha Colony District is an area of Neenah originally developed by prominent Menasha industrialists who wanted to live in proximity to their milling interests as well as the social milieu of Neenah. The development of this district added to the social and economic stratification of the two cities and helped give rise to the impression that Neenah was a city of mill owners while Menasha was a city of mill workers.

The Menasha Colony District is of local significance. The residents of this district for the most part did not extend their influence beyond the Fox River Valley. Their homes while large and impressive are not known to be representative works of noted architects. Nevertheless, the Menasha Colony District is the most notable neighborhood on Doty Island and would be considered the most significant historic district in Menasha were it within its city limits. One property in the Menasha Colony District is listed on the National Register. (See MAP IV and TABLE II)

The most striking feature of the Menasha Colony district is the number of homes associated with the business leaders of Menasha. Those properties associated with the Whiting and Gilbert families include 620 E. Forest Avenue (Barnes-Whiting House), 910 E. Forest Avenue (Syme-Gilbert House), 1010 E. Forest Avenue (Gilbert-Lachmann House) and 324 Ninth Street (Theodore Gilbert House). Those properties associated with the Smith family of the Menasha Wooden Ware Company are 706 E. Forest Avenue (Henry Smith House), 824 E. Forest Avenue (Charles R. Smith House, NRHP 1979), 1002 E. Forest Avenue (Bacon-Johnson House) and (300) Seventh Street (Smith Family Indoor Tennis Court). Other properties associated with Menasha industrialists or businessmen include the Judge J.C.

Kerwin House at 516 E. Forest Avenue, the Lyall Pinkerton House at 325 Ninth Street and the Harry DeWolf House at 402 Ninth Street.

Wisconsin Avenue Commercial District

The Wisconsin Avenue Commercial District is the third largest district and contains 38 properties. Begun by the flour millers to capture the trade of local wheat farmers, this central shopping area was established near the mills at the heart of the city. With the growth of paper, industrialists began to disassociate themselves from local commerce. During the 1880's and 1890's, this district reached its peak under the leadership of an emerging merchant class. As with the Menasha Colony District, the Wisconsin Avenue Commercial District compliments the Park Place District. More than one fourth of all the buildings and businesses on West Wisconsin Avenue were built or operated by individuals living on East Wisconsin or North Park Avenue.

The Wisconsin Avenue Commercial District is of local significance. While somewhat altered and generally undistinguished architecturally, the buildings maintain a united integrity that typifies 19th century commerce in Wisconsin. Its location also establishes the close relationship between commerce, industry and leadership during the second half of the last century (See MAP V and TABLE III).

Many stores in the Wisconsin Avenue Commercial District were either built or operated by individuals who built homes in the Park Place District. In particular, Henry Sherry was responsible for the construction of 111/113/115 W. Wisconsin Avenue, 121/123 W. Wisconsin Avenue, 126 W. Wisconsin Avenue and 137/-139/141/145 W. Wisconsin Avenue which was also known as Sherry's Post Office Block. Those properties associated with merchants who built homes in Park Place include 110 W. Wisconsin Avenue (Kalfahs' Dry Goods Store), 112 W. Wisconsin Avenue (Dau & Madsen Clothiers), 118 W. Wisconsin Avenue (Hanson Brothers Clothiers), and 124 W. Wisconsin Avenue (Ulrich's Meat Market).

Sherrytown District

The Sherrytown District is the largest of three small districts. It contains 9 properties and is the only a segment of a once larger neighborhood disrupted by past commercial expansion. The Sherrytown District is part of Neenah's oldest neighborhood where pioneer flour millers and paper manufacturers first lived. Within sight of the mills, stores and banks, this district was later abandoned by the local industrialists in favor of the more rural Park Place District.

The Sherrytown District is of local significance. It is associated with Henry Sherry, one of the area's most prominent lumbermen. The district helps establish the parameters of the village and the close relationship of its many parts. The district is also defined by the only turn-of-the-century limestone curbs left in the city (See MAP VI and TABLE IV).

This district, while small, has two of the most distinguished properties in the city. These are the Sherry-Smith House at 303 S. Church Street and the D.C. Van Ostrand House at 413 S. Church Street. The first was built by pioneer miller Hugh Sherry and is an good example of a brick Greek Revival home. The second was built by miller, manufacturer and banker Dewitt Clinton Van Ostrand, and it is the best example of Italianate architecture in the city. The neighborhood of which this district was a part was also cited in Glaab & Larson's Factories in the Valley, as an example of the ethnic homogeneity in Neenah's neighborhoods. Those properties with ethnic associations include 311 S. Church (Heywood-Sorenson House), 419 S. Church Street (Nels Winter House) and 212 Smith Street (William Gerhardt House).

Island City Residential District

The Island City Residential District contains 10 properties and is a part of what became a semi-independent community on Doty Island. Roughly defined by the Chicago & Northwestern Railroad and the Fox River, this area was populated by some of the leading foreign-born citizens of Neenah. Separated by the railroad traffic on one side and the river and mills on the other, this area developed its own churches, shopping district and social structure.

The Island City Residential District is of local significance. It establishes Neenah's ethnic mix, the 19th century merchant class and the interaction of commerce, industry and topography with community demographics (See MAP VII and TABLE V).

Those properties with ethnic/merchant associations include 238 Bond Street (Joseph Patzel House), 210 High Street (Carl Jersild House), 213 High Street (Callahan-Hauser House), 219 High Street (Hanson-Jasperson House), 220 High Street (William Stridde House) and 303 High Street (Ernst F. Wieckert House).

Island City Commercial District

The Island City Commercial District is the smallest district in the city containing only 7 properties. It is at the center of the shopping area that was developed to serve the semi-independent community on Doty Island.

The Island City Commercial District is of local significance (See MAP VIII and TABLE VI).

The particular feature of this district is that most of the buildings were either built or operated by a member of the Herziger family. Those properties include 300 N. Commercial Street (Herziger's Buffet Sample Rooms), 301/303 N. Commercial Street (Herziger Block), 302 N. Commercial Street (The Doty Theater), 303 N. Commercial Street (Augustinus Loos Bakery) and 311 N. Commercial Street (Charles Herziger's Saloon).

Individual Properties

In addition to the preceding six districts, there are 28 individual properties potentially eligible to the National Register (See TABLE VII). The following properties were identified for their architectural and historical significance:

---The WHITING BOATHOUSE is a stucco Mediterranean Eclectic building designed by Fluor Brothers of Oshkosh and Robert M. Messmer of Milwaukee. Begun in 1932 as a second home hideaway for Frank Whiting, president of the George A. Whiting Paper Company, it epitomizes the extravagant lifestyle that the paper industry supported at one time. (Local)

---The NEENAH PAPER COMPANY OFFICE BUILDING is a stone Neo-Georgian office building attached to the NEENAH PAPER COMPANY MILLS, a complex of yellow brick Vernacular industrial buildings and one red brick industrial building with Art Deco trim. Begun in 1874 as the Patten Paper Mill, this complex depicts the continued prosperity of the paper industry and includes the oldest paper mill still standing in Neenah. It is the only part of the mill district which has retained its original appearance and still reflects the aesthetic values of its owners and management. (Local)

---The CHICAGO & NORTHWESTERN DEPOT is a red brick Victorian Romanesque train station similar to the South Milwaukee Depot. Built in 1892 by C.S. Frost and larger than the depots at Oshkosh or Appleton, it was constructed during the 19th century peak of the paper industry and reflects the importance of the commercial connection with Chicago. (Local)

---The S.A. COOK ARMORY is a red brick Medieval armory with crenelated corner towers. Built in 1906 by S.A. Cook (industrialist, mayor and congressman), it was headquarters of Company I of the old "First Wisconsin" infantry regiment and reflects the patriotic spirit of Neenah and Menasha. (Local)

---The KIMBERLY HIGH SCHOOL is an orange brick school building in the Gothic tradition of Eastern colleges. Built in 1907 it was the city's first formal high school building and is named for Kimberly-Clark founder J.A. Kimberly, who was then Superintendent of Schools. (Local)

---DOTY PARK was given to the city by C.B. Clark in 1922 and developed by the Park Department under the direction of S.F. Shattuck. In 1928 Elizabeth Thuerer of Appleton landscaped the park and the stone and stucco structures were designed by Foeller, Schober & Boerner of Green Bay. The grand opening included the first outdoor dramatic production north of Milwaukee. (Local)

---The ERNST MAHLER HOUSE is a half-timbered Tudor Period house designed by Childs & Smith of Chicago and A.C. Eschweiler of Milwaukee. Begun in 1921 it is one of five "Great Houses" built between Oshkosh and Appleton and was the home of the perfecter of Cellucotton and the founder of the Institute of Paper Chemistry. (State)

---The HIRAM SMITH HOUSE is one of a small number of Octagon houses built in the United States. A radical departure from the architecture of their day, most of these houses are found in New York, Massachusetts and Wisconsin. Its builder was a founder of the first paper mill in Neenah and the Manufacturers' National Bank (Marine National Bank). (State)

---SHATTUCK PARK was donated to the city by Mrs. F.C. Shattuck and included a stucco Arts and Crafts Neo-Grecian pavillion patterned after early 19th century Green Revival market buildings. Built in 1915 it was designed by Clare Hosmer. (Local)

---The DANISH LUTHERAN CHURCH PARSONAGE is a brick Vernacular house. Built in 1872 it is the oldest church-related building in the city (and the only building with strong ethnic associations) in its original condition. (Local)

---The NEENAH OPERA HOUSE is a red brick early Prairie School theater building. Built in 1902 it was designed by Sidney Lovell of Chicago. The opera house was the first community project supported by Neenah's great industrial wealth. (Local)

---The WINNEBAGO PAPER COMPANY OFFICE BUILDING is a red brick Richardsonian Romanesque building. Built in 1893 at the height of the paper industry in the 19th century, it is one of two Romanesque buildings in the city. (Local)

The following independent properties are of architectural significance only:

---The P.H. MILLER HOUSE is a brick, late Gothic Revival cottage with highly decorated gable ends and ornamented window caps. It was built in 1878 by a shopkeeper and is the only one of its kind in the City. (Local)

---The JOHN TESSENDORF HOUSE is a late Italianate frame house with a Stick Style porch. It was built in 1888 by an engineer for the Wieckert Lumber Company and is the best preserved in Neenah. (Local)

---The NELS JENSEN HOUSE is a brick Vernacular house with Italianate and Second Empire features. It was built in 1877 for a miller turned justice of the peace and is in an excellent state of preservation. (Local).

---The EQUITABLE FRATERNAL UNION BUILDING is a limestone Neo-Classical commercial building of grand proportions. It was built in 1909 and was designed by William Waters of Oshkosh. (Local)

---The U.S. POST OFFICE is a brick Neo-Georgian post office of distinguished design. Built in 1916 it was the work of William A. Wetmore. (Local)

---The HENRY PAEPKE HOUSE is an Irregular Queen Anne Vernacular frame house with applied Stick Style features. It was built in 1885 by a local building contractor. It is the only house in the City with strong stick style influence. (Local)

---The REV. HIRAM MARSH HOUSE is a frame Greek Revival house. It was built for a pioneer minister of the First Presbyterian church, and is the least altered example in Neenah. (Local)

---The W.Z. STUART HOUSE is a late Queen Anne-Shingle Style frame house with an added enclosed porch. Built in 1890 for an executive of Kimberly--Clark, it was later moved from Wisconsin Avenue. (Local)

---The CARLTON R. SMITH HOUSE ("Open Meadow") is a grand frame Colonial Revival Period house. It was built in 1926 for the grandson of the founder of Menasha Wooden Ware Company (Menasha Corporation). (Local)

---The ALBERT EISENACH HOUSE is a brick Italianate-Victorian house. It was built in 1879 for a local brickmaker and remains unaltered. (Local)

---The LOUIS JOURDAIN HOUSE is a frame Queen Anne house with highly decorated Stick Style gable ends. It was built in 1888. (Local)

The following independent properties are of historical significance only:

---The RELIANCE MILL is a stone industrial building with an altered parapet. It was built in 1868 by John Kimberly, J.A. Kimberly and Havilah Babcock, and is the only flour mill still standing in Neenah. It was the largest single flour mill ever built in Neenah and was later incorporated into the Badger Paper Mill. (State)

---The GRAND LOGGERY is a dog-run style double log house. Built in 1845 for Governor Doty, it was the focal point of Neenah's early settlement. It was moved to Doty Park in 1926 and reconstructed in 1948. The Grand Loggery is already listed on the National Register. (State)

---The BERGSTROM BROTHERS' STOVE WORKS is a brick and stone Vernacular industrial building. Begun in 1857 as Moore and Wells' "Neenah Stove Works", it is the oldest industrial building in the city. (Local)

---The HARRISON REED BARN was built in 1847 and is the oldest structure still standing in the city. Its builder was the founder of the Milwaukee Sentinel, brother of Mrs. Alexander Mitchell and later governor of Florida. He was also one of the founders of the Republican Party. (State)

---The WISCONSIN CENTRAL CROSSING HOUSE is reputed to be last switching house on the Soo Line. (Local)

RECOMMENDATIONS

DEIDRICK WALDEMAR BERGSTROM SR. HOUSE
(Demolished in 1966)

Ca. 1893

Courtesy of George and Ila Arndt

The purpose of this section is to recommend a three-step course of action aimed at preserving the historical and architectural heritage of the community. The first step is to educate the general public regarding the Intensive Survey and its results. The second step is to nominate the Wisconsin Avenue Commercial District to the National Register. The third and final step is to formulate a landmarks commission ordinance tailored to the districts and the individual properties identified in the survey. Steps one and two fulfill the requirements of the original agreement made with the Historic Preservation Division. Step three, however, provides for the long-range use of the survey and the integration of historic preservation into private and public planning. Each step is recommended on the basis of a growing demand for historic preservation in Neenah.

Historic Preservation In Neenah

Historic preservation became a community concern in 1966 when the D.W. Bergstrom Sr. House was demolished to make way for the new post office. Citizens throughout the community were shocked by the destruction of this fine home and the disruption of a residential neighborhood. Historic preservation as a political issue began not long afterwards in 1972, when a group of citizens initiated an effort to save the old City Hall. With only a dim awareness of the National Historic Preservation Act of 1966, the National Trust for Historic Preservation and the National Register of Historic Places, these citizens tried to transform a growing nation-wide movement into local action. Their five year effort preserved only the City Hall Clocktower, but through their effort they identified the depth of community concern for preserving the functional reminders of the past.

The high visibility of their concern stimulated other private preservation

efforts: in 1973 the Grand Loggery was entered on the National Register, followed by the Havilah Babcock House in 1974, the Franklyn C. Shattuck House in 1978 and the Charles R. Smith House in 1979. In 1978 the Havilah Babcock House also underwent a two-year restoration of its roof and chimneys by means of a matching grant-in-aid from the National Register grant program. The Neenah Historical Society, as a barometer of this momentum, grew from 25 members in 1977 to 250 in 1980.

Also, 1980 marked the beginning of the Neenah Historical and Architectural Survey and Nomination Project. Its purpose was to conduct an intensive survey of the city's historical and architectural resources, to nominate the downtown commercial district to the National Register and to integrate historic preservation into public and private planning. Funded with a matching grant-in-aid from the National Register, the project combined the diverse interests and objectives of the Neenah Department of Community Development, the Neenah Downtown Business Association and the Neenah Historical Society.

Pooling their resources under the direction of the Department of Community Development, each contributed towards establishing initial preservation goals for the community. The Department of Community Development sought a comprehensive list of districts and independent properties eligible to the National Register in order to facilitate its compliance with the National Preservation Act in regard to the use of federal funds. The merchants sought downtown nomination in order to utilize the tax incentive program as a means to encourage downtown redevelopment. Finally, the Neenah Historical Society saw the project as a way to identify local landmarks.

The historic preservation movement in Neenah has grown steadily, to the point where it has incorporated the support of community leaders who once opposed the preservation of the clocktower. It has progressed from the identification of community concern to the identification of historical and

architectural resources. Now the movement is entering a new phase of development. Neenah's historic commercial buildings are becoming a keystone to downtown redevelopment. The historic preservation movement in Neenah has identified its historical and architectural resources as potential economic assets, as well as a rallying point for community solidarity.

A part of this new phase is the formation of a landmarks commission ordinance. When enacted a landmarks commission ordinance would establish a commission of citizens directed to supervise the preservation of locally designated landmarks. The commission would also serve to educate the public, promote additional preservation legislation, coordinate preservation efforts and raise funds for special preservation projects. In addition to these functions, a landmarks commission ordinance would be an important instrument in equalizing the distribution of preservation benefits within the community.

The primary source of preservation benefits is currently through the National Register of Historic Places. The National Register is a list of properties of clear historical and architectural significance from a national perspective. Listing on the register is essential to be eligible for current tax credits for rehabilitating historic structures, but only depreciable investments are allowable. Residential restorations such as those recently made to the Charles R. Smith House and the Franklyn C. Shattuck House have no recourse to these tax credits. Similarly, no grants-in-aid will be available due to current federal cut-backs.

A landmarks commission, however, makes its own determination of what is important to the community and can employ additional means to encourage residential and commercial investment. In cooperation with other city offices, the commission can have at its disposal preservation zoning, subdivision controls and revolving funds to preserve and rehabilitate landmarks. Through the application of these controls, property owners can be assured that their

investment will be protected and supported by the community.

Recommendation I: Public Education

Upon the submission of the Intensive Survey Report to the Historic Preservation Division and the Neenah City Council, the Neenah Department of Community Development should arrange public meetings in order to present the results of the survey to the community. One of these meetings should be specifically set aside for the owners of properties identified as potentially eligible to the National Register. A special meeting should also be arranged for city employees, civic leaders, members of the Chamber of Commerce, local bankers, school teachers and realtors. A seminar on the National Register and the nomination process should follow for those property owners interested in having their properties nominated. This seminar should be arranged by the Neenah Historical Society in cooperation with the Department of Community Development and the Historic Preservation Division.

Recommendation II: Commercial District Nomination

At the conclusion of the public meetings, the Primary Investigator should assist the Department of Community Development in submitting the Wisconsin Avenue Commercial District to the National Register. This assistance should consist of completing the nomination forms, preparing maps and taking additional pictures and slides as necessary. In consultation with the property owners and the downtown merchants, the Department of Community Development should determine if any additional commercial properties should be nominated along with the district. Among those properties that should be considered for their downtown or commercial orientation are the following:

Neenah Opera House; 116 East Wisconsin Avenue
Equitable Fraternal Union Building; 116 South Commercial Street
Winnebago Paper Company Office Building; 225 West Wisconsin Avenue
U.S. Post Office Building; 307 South Commercial Street
Island City Commercial District
Chicago & Northwestern Depot; 500 North Commercial Street
Wisconsin Central Switching House; (400) West Wisconsin Avenue
Northern Pacific Hotel; 432 Sherry Street

Recommendation III: Landmark Commission Ordinance

Concurrent with the preceding step, the Mayor should appoint an ad hoc citizens committee to formulate a landmarks commission ordinance. Appointments should attempt to include an architect, a downtown merchant, a realtor, a banker, a lawyer, a building contractor and at least one representative from each historic residential district. Ex Officio members should include the Mayor or a member of the Common Council, a staff person from the Department of Community Development, the City Attorney and a member of the Neenah Historical Society. The Department of Community Development should prepare a folder of study materials for each committee member. Included in these materials should be the Intensive Survey, The Constitutional and Statutory Validity of a Municipal Historic Preservation Ordinance in Wisconsin (Center for Public Representation, Inc.) and sample ordinances from Wisconsin cities with successful historic preservation programs.

The citizens committee should recommend what role a Neenah landmarks commission would play in the community in relationship with national, state and local agencies. The committee should also recommend for Council adoption the following ordinance provisions: 1) a statement of purpose; 2) a definition of terms; 3) the makeup and term of commissioners; 4) the powers and duties of the commission; 5) the criteria and procedures for designating an historic district;

6) the criteria and procedures for designating landmarks; 7) provisions for recognition and marking of landmarks and districts; 8) regulation of altering designated landmarks; 9) methods of enforcement; and 10) other duties and powers.

Until the committee completes its work, all publically financed improvements involving the alteration or demolition of districts or individual properties identified in the Intensive Survey should be postponed. These improvements include the widening of Church Street and the demolition of the Doty Park pavillion. Privately financed alterations or demolitions, however, would not be affected. Efforts should be made to encourage these private individuals to refrain from any such action until the committee has completed its work.

Conclusion

The success of the historic preservation movement in Neenah is dependent upon public support of private effort. While the nomination of the downtown commercial district offers new opportunities for commercial building renovation, the long-term success of historic preservation lies in the creation of a landmarks commission ordinance.

Parklawn District

The Parklawn District is a part of what was the Stridde-Herziger Farm, platted in 1928 by Louis Herziger, Jr. Intended as a "restricted" neighborhood, this area remained undeveloped until the 1930's when numerous homes were built by the growing middle-management of Neenah and Menasha industry. Some of the homes on Park Drive reflect the grandeur of homes on North Park Avenue (See Park Place District), and all reflect the stability of the local economy that existed during the Depression. The homes are predominantly Colonial Revival Period homes and are mostly the work of a single architect. (See Map Ia and Table Ia).

Bohnenville District

The Bohnenville District was begun after World War II and was Neenah's first "tract" development. Intended for returning veterans and financed by the federal government, the homes were purchased by many junior executives of the Kimberly-Clark and Marathon Corporation. The area was developed by Arthur Bohnen of Chicago, who was later put on trial charged with misuse of federal funds. (See Map IIa and Table IIa)
